Did You Know?

Boil Water Advisories and Orders are two different things. Advisories are precautionary measures by a utility when contamination could have occurred, testing is in progress, but no contamination has been identified. An Order is normally only issued by the Department of Natural Resources when testing has confirmed a health threat. The City may also issue an Order if they determine a particular situation warrants it. For more information, contact Public Works at 573-243-2300.
